Submitted By

Batch No: IB-SQA-05

Student Name: Sumaya Pahar

Part A: Additional Edge Case Test Cases for Facebook Create New Account

Test Case FCAN_031 – Name field with Unicode characters

Feature: Create New Account

Test Scenario: User enters Unicode characters from different languages in the name field

Test Steps:

1. Navigate to www.facebook.com
2. Click "Create New Account"
3. Enter Unicode characters in first and last name fields
4. Fill all other fields correctly
5. Click "Sign Up"

Test Data:

First Name: Sumaya

Last Name: Pahar

Expected Result: System accepts valid Unicode characters and account creation proceeds successfully without encoding issues.

Test Type: Edge Case / Internationalization

Test Case FCAN_032 – Name field with leading and trailing spaces

Feature: Create New Account

Test Scenario: User enters names with unnecessary leading/trailing spaces

Test Steps:

1. Navigate to Facebook signup page
2. Enter names with spaces before and after text
3. Fill all other fields correctly
4. Click "Sign Up"

Test Data:

First Name: " John "

Last Name: " Doe "

Expected Result: System trims unnecessary spaces automatically before saving data.

Test Type: Edge Case

Test Case FCAN_033 – Extremely long email address

Feature: Create New Account

Test Scenario: User enters email address exceeding normal length limits

Test Steps:

1. Open signup form
2. Fill all fields correctly
3. Enter a 320+ character email address
4. Click "Sign Up"

3. Verify incorrect autofill data
4. Attempt signup

Test Data: Outdated email or phone number from browser autofill

Expected Result: User can edit autofilled fields easily and validation works correctly.

Test Type: Edge Case / Usability

Test Case FCAN_037 – Copy-paste script into name field

Feature: Create New Account

Test Scenario: User pastes script or HTML content into name field

Test Steps:

1. Open signup page
2. Paste HTML/JavaScript into first name field
3. Fill other fields correctly
4. Submit form

Test Data:

First Name: "John"

Expected Result: HTML/script content is escaped or rejected. No code execution occurs.

Test Type: Edge Case / Security

Test Case FCAN_038 – Date of birth leap year validation

Feature: Create New Account

Test Scenario: User enters February 29 on leap and non-leap years

Test Steps:

1. Open signup form
2. Enter leap year date
3. Submit form
4. Repeat with non-leap year date

Test Data:

Valid: 29 February 2024

Invalid: 29 February 2023

Expected Result: Leap year date accepted. Non-leap year date rejected with proper validation message.

Test Type: Edge Case / Boundary

Test Case FCAN_039 – Session timeout during signup

Feature: Create New Account

Test Scenario: User stays idle on signup page for a long time before submitting

Test Steps:

1. Open signup form

2. Fill partial information
3. Stay idle for extended period (30+ minutes)
4. Complete remaining fields and submit

Test Data: Valid signup data

Expected Result: Session timeout handled gracefully. User receives proper message or can continue safely.

Test Type: Edge Case / Security

Test Case FCAN_040 – Signup using disposable email address

Feature: Create New Account

Test Scenario: User attempts signup using temporary/disposable email provider

Test Steps:

1. Open signup page
2. Enter disposable email address
3. Fill all required fields
4. Submit form

Test Data:

Email: "test@tempmail.com"

Expected Result: System either accepts with verification requirement or blocks disposable email based on policy. No unexpected behavior occurs.

Test Type: Edge Case / Security

Part B: Additional Edge Case Test Cases for Facebook Login

Test Case FLOG_027 – Login using copied password with invisible spaces

Feature: Login

Test Scenario: User copies password from another source containing hidden spaces or newline characters

Test Steps:

1. Navigate to login page
2. Copy password from text editor containing trailing newline
3. Paste password into password field
4. Click "Log In"

Test Data:

Password: "CorrectPass123\n"

Expected Result: Login fails if hidden characters are included. Clear error message displayed.

Test Type: Edge Case

Test Case FLOG_028 – Very long input in login fields

Feature: Login

Test Scenario: User enters extremely long strings in email and password fields

Test Steps:

1. Open login page
2. Enter 1000+ character string into email field
3. Enter 1000+ character string into password field
4. Click "Log In"

Test Data:

Email: [1000-character string]

Password: [1000-character string]

Expected Result: System safely handles oversized input without crash, slowdown, or buffer overflow issues.

Test Type: Edge Case / Security

Test Case FLOG_029 – Login with browser cookies disabled

Feature: Login

Test Scenario: User attempts login with browser cookies disabled

Test Steps:

1. Disable browser cookies
2. Navigate to Facebook login page
3. Enter valid credentials
4. Click "Log In"

Test Data: Valid credentials

Expected Result: Appropriate warning displayed indicating cookies are required for login/session management.

Test Type: Edge Case / Compatibility

Test Case FLOG_030 – Simultaneous logout from another device during active session

Feature: Login

Test Scenario: User is actively using account on Device A while account is logged out remotely from Device B

Test Steps:

1. Login on Device A
2. Login on Device B
3. From Device B, select "Log out from all devices"
4. Continue activity on Device A

Test Data: Same account credentials

Expected Result: Device A session is terminated automatically and redirected to login page securely.

Test Type: Edge Case / Security

Test Case FLOG_031 – Login with Unicode email-like characters

Feature: Login

Test Scenario: User enters visually similar Unicode characters in email field

Test Steps:

1. Navigate to login page
2. Enter email containing Unicode lookalike characters
3. Enter password
4. Click "Log In"

Test Data:

Email: "john@example.com" (Cyrillic 'o' instead of English 'o')

Expected Result: System properly validates input and prevents spoofing/confusion issues.

Test Type: Edge Case / Security

Test Case FLOG_032 – Browser refresh during login processing

Feature: Login

Test Scenario: User refreshes page while login request is processing

Test Steps:

1. Enter valid credentials
2. Click "Log In"
3. Immediately refresh browser page

Test Data: Valid credentials

Expected Result: System handles interrupted request safely without duplicate sessions or inconsistent state.

Test Type: Edge Case / Reliability

Test Case FLOG_033 – Login after password reset from another device

Feature: Login

Test Scenario: User resets password on one device while another device still has active login page open

Test Steps:

1. Open login page on Device A
2. Reset password using Device B
3. Attempt login on Device A using old password

Test Data: Old password after reset

Expected Result: Old password no longer works. User must login using newly reset password only.

Test Type: Edge Case / Security

Test Case FLOG_034 – Auto-complete selecting wrong saved account

Feature: Login

Test Scenario: Browser auto-complete selects unintended saved account

Test Steps:

1. Open login page with multiple saved accounts
2. Select incorrect auto-complete suggestion accidentally
3. Attempt login

Test Data: Wrong auto-filled email account

Expected Result: User can easily edit/remove autofilled account information before submission.

Test Type: Edge Case / Usability

Test Case FLOG_035 – Switching network during login

Feature: Login

Test Scenario: User switches from WiFi to mobile data during login processing

Test Steps:

1. Connect device to WiFi
2. Enter valid login credentials
3. Click "Log In"
4. Immediately switch to mobile data

Test Data: Valid credentials

Expected Result: Login process either completes successfully or displays recoverable network error without corrupting session state.

Test Type: Edge Case / Reliability

Test Case FLOG_036 – Multiple browser tabs login synchronization

Feature: Login

Test Scenario: User opens multiple Facebook login tabs simultaneously

Test Steps:

1. Open Facebook login page in multiple tabs
2. Login successfully in one tab
3. Refresh other tabs

Test Data: Valid credentials

Expected Result: Other tabs automatically recognize active session and redirect user appropriately.

Test Type: Edge Case / Functional

Conclusion

This updated assignment extends the original Facebook Create New Account and Login test suite by incorporating advanced edge case scenarios. The additional edge case test cases improve coverage for internationalization, Unicode handling, oversized inputs, browser behavior, session handling, reliability, usability, and security-related scenarios. These updates ensure that the Facebook au
